

POPPIES!

BY LUANNE CORTS
CLPLCR007

The poppy flower template included in the pattern was found to be missing a layer. The original printings of the pattern will show a flower with two outer layers and a center circle. The corrected version has three outer layers and a center circle.

New template is on the second page.

****Please note that both versions will make the quilt in the same manner, and either version will produce a beautiful result. This example was made using the two outer layers and center circle. The sample in the original photo is made with three outer layers and a center circle.**
